Emission-related installation instructions

Failing to follow these instructions when installing a certified engine in a piece of nonroad equipment violates federal law (40 CFR 1068.105(b)), subject to fines or other penalties as described in the Clean Air Act.

1. Exhaust system

Since increase of exhaust back pressure of engine may affect the engine's combustion and emissions, the maximum allowable back pressure of Mitsubishi diesel engine is 5.88 kPa.
Also, the engine must be installed in a nonroad equipment in a way that sampling of exhaust emissions is possible when it is installed in the equipment or replaced in service, as shown in Fig.1.

Fig.1 S12R-PTAW Engine

2. Limited applications

This engine is certified for constant speed, stationary emergency application only.

3. Nonroad labeling requirements

If you install the engine in a way that makes the engine's emission control information label hard to read during normal engine maintenance, you must place a duplicate label on the equipment, as described in 40 CFR 1068.105.

(1) Emission Control Information

Emission Control Information label (Fig.3) is placed on the rocker cover of the No.3 cylinder, as shown in Fig.2.

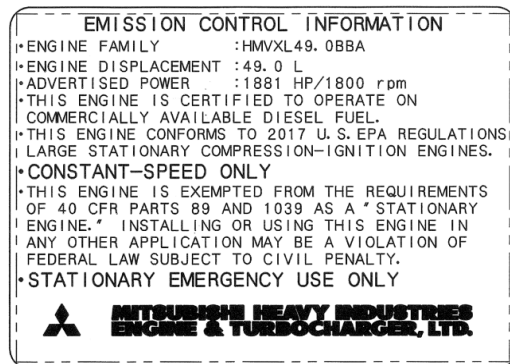

Fig.3 Emission Control Information Label

(2) Engine manufacture date

Engine manufacture date is engraved in the engine name plate as shown in Fig.4.
This name plate is placed on the crankcase near No.6 cylinder.
